

# Project COMORES

## COMOROS ARCHIPELAGO

### THE PROBLEM

Supply of white road paint for the rehabilitation of two national roads, with the following specifications :

- good adhesion to asphalt
- high durability
- good visibility at night without dazzling effect during the day
- absence of toluene

### OUR SOLUTION :

To address the issues :

- **White solvent paint certified** for 1 million passes (P5R2Q3S2 standard)
- **Glass beads for a reflective but non-glare appearance**
- **Hazardous materials management** : declaration of hazardous products and organization of special transport

#### THE PROJECT IN SHORT :

##### ✓ AREA OF INTERVENTION :

- **Rehabilitation of two national roads** :  
on the main island, the RN 2 which links Moroni to Foubouni, i.e. 47 km, and the RN 23, on the island of Ndzuani-Anjouan, which links Sima to Moya, 26 km

##### ✓ DEADLINE : 7 days

##### ✓ SHIPPING :

- 9 tons of white solvent paint
- 8 tons of glass beads
