

Project SINGROBO

IVORY COAST

THE PROJECT IN SHORT :

Located in Ivory Coast, near the villages of Singrobo and Ahouaty, the project involves the construction and operation of a hydroelectric power plant on the Bandama River. The project is expected to produce 217 GWh annually.

Various developments are linked to the project :

- Dams on the banks
- Reservoir of 105 hm³
- Flood evacuator
- Water intake structure
- Surface plant at the foot of the dam
- Tailrace
- Various temporary constructions

OUR SOLUTIONS :

Soléane provided 4 turnkey workshops :

✓ Welding workshop :

- autonomous group,
- welding stations,
- flame welding,
- consumables,
- spare parts

✓ General mechanical workshop :

- hand tools,
- drill press,
- grinding wheel,
- grinding wheel...

✓ Vulcanization workshop : (for tire repair)

- tire changer,
- balancing for trucks
- construction equipment,
- accessories

✓ Paint shop :

- spray guns,
- compressors,
- vacuum system
